

High quality child care looks like

MUSIC.

There's more to music than entertainment. Music introduces new words and brings the brain and body together.

Clapping, singing and dancing help children recognize patterns. Understanding patterns helps with math and more.

Patterns lead children to predict what comes next. Routine makes children feel secure. That makes them more open to learning.

Find child care that turns up the volume on happy and learning. Visit our website to find high quality child care.
