

High quality child care looks like

PLAY.

How does play prepare your child for kindergarten?

When children pretend, they use their imaginations. Imagination is a key to learning. A child that can imagine she is a bird can imagine that letters represent sounds. She can understand that numbers represent quantities.

Experts tell us play is a child's way of learning. Through play, children develop the skills that lead to success in school and in life.

Find quality child care providers that know the value of play. Visit our website to find high quality child care near you.
